The CS-1 integrated AV system is a simple “out of box” integrated solution that enables you to control both audio and video intuitively to meet the requirements of a demanding business environment.

Controller

The Controller, the heart of the system, stores video, music and photos. With inputs including microphone, audio and USB. Outputs, audio HDMI.

A carefully designed interface panel allows excellent control of various inputs, including video sources via touch panel, navigation keys and tone/volume controls.

On-board 4GB of memory to store Music, Photos and Video

Subwoofer/satellite systems

- > Elegant design
- > High output SPL and sensitivity
- > Deliver high fidelity and extended bandwidth reproduction of voice and music
- > Modular design allows for 2 or 4 satellites per sub module
- > Ability to link multiple systems together

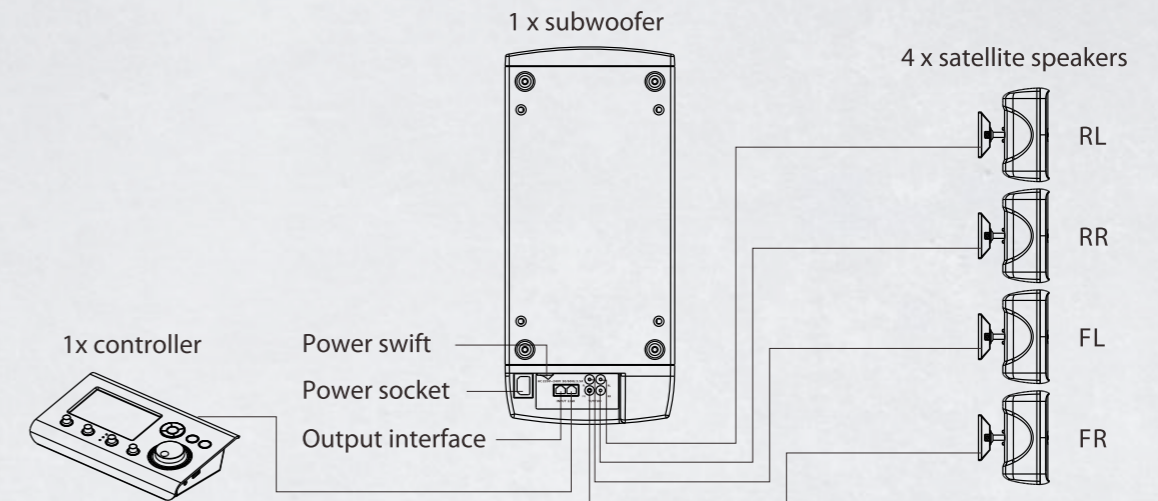

Wide application

CS-1 integrated AV system is not only excellent for use as a foreground or background music system, but has the added bonus of being able to be used for exceptional speech reproduction. In addition, it enables you to control the presentation of audio visual material within your environment.
