Description

$\beta 3^{\circ}$ MUI2a is a two way full range active speaker adopting the new structure and new painting technology. It consists of one 12" transducer, one 3" compression driver and one two channel high power amplifier module.

Round copper wire used in 75mm voice coil in the 12" transducer, and the bobbin uses high intensity TIL material, which both enhances the intensity and bearing capacity of the voice coil. Symmetrical magnet circuit design reduces the odd harmonic distortion to minimum to satisfy listening requirement of human being.

The wedge shaped cabinet is made from 15mm birch plywood without using any nail, and be painted with advanced environmental protection Polyurethane-based paint which is very rigid.

The tension of the cabinet reaches to 4500N.

Q235 grille is coated by powder to ensure its weatherproof ability, which can be used for 5 years.

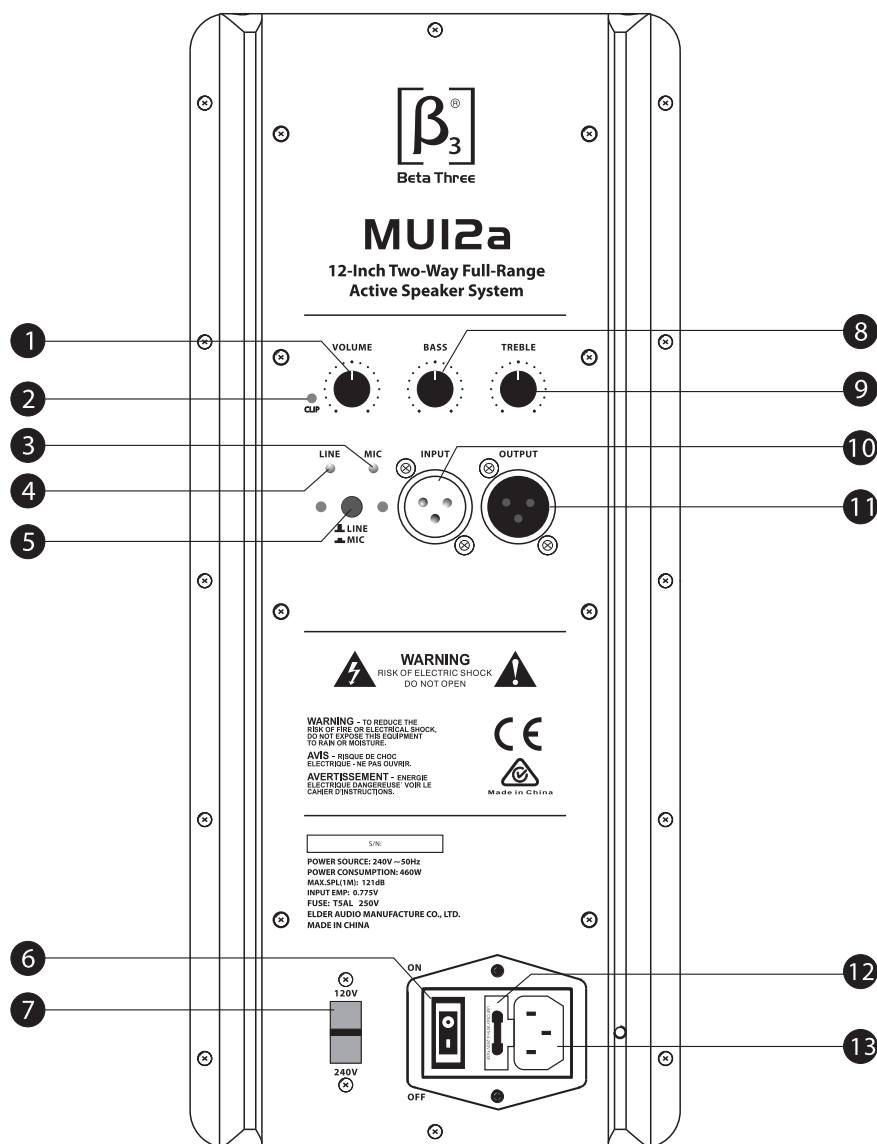

To meet the sound requirement, a lot of new materials were used on MUI2a. For the driver, the diaphragm is using Aluminum magnesium alloy to reduce the distortion.

MUI2a is mainly designed for conference room, multi-functional hall, hall of worship, auditorium, church and touring performance.
